

Log Viewer

Course: A-Level C# .NET Adv 1
Presented: Vasyl Travin

Purpose of Log Viewer

Log Viewer is designed to provide limited access to production databases and logs tables in them for employees of one company.

Main problems with reading logs:

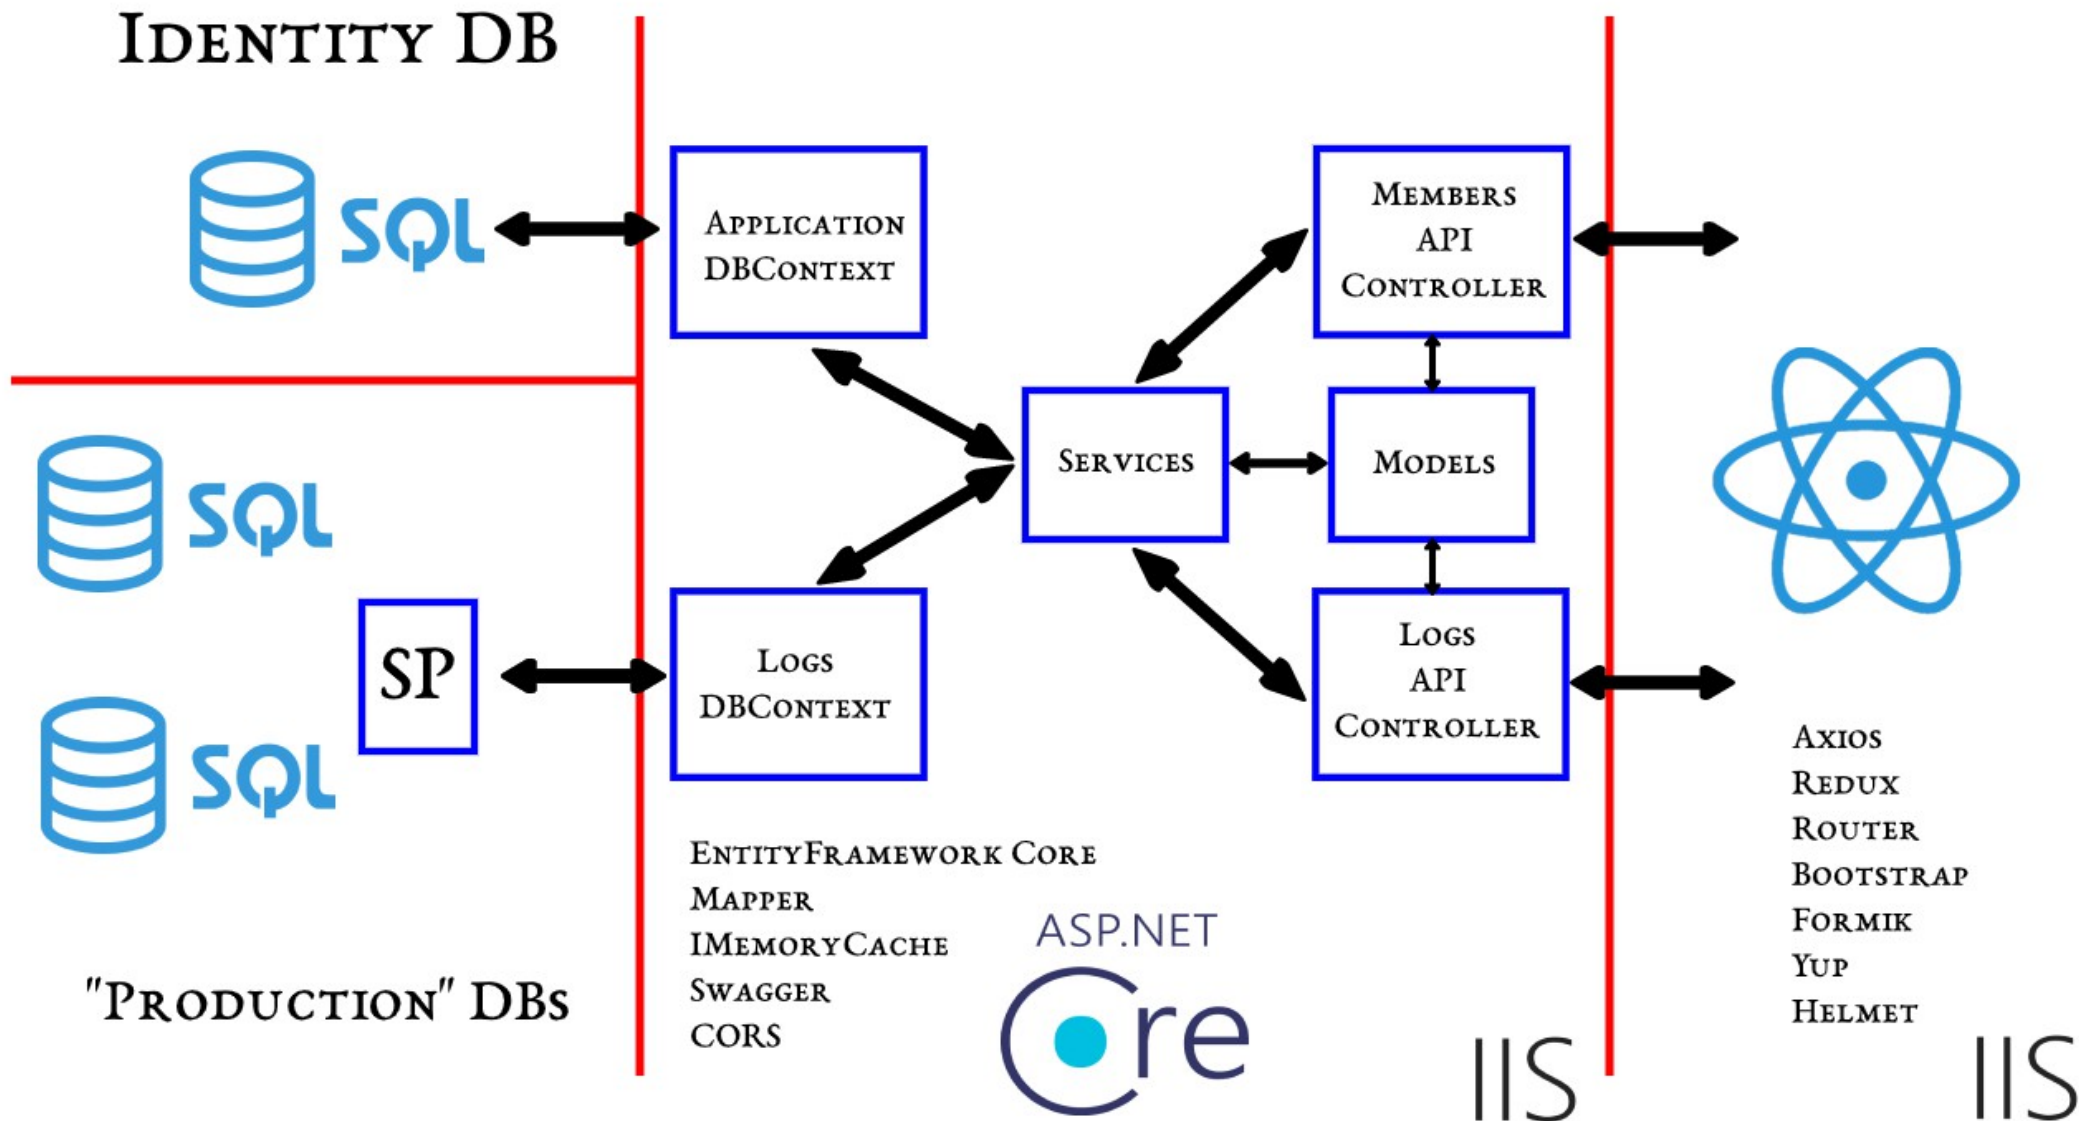

- Manual access;
 - Multistep getting process;
 - Restricted rights of production databases;
 - Dislocation of logs;
-
-

Purpose of Log Viewer

Aims and Goals:

- Filtering and Pagination;
 - Independence of the server code from databases structure;
 - Fast and easy process granting/denying access to logs;
 - Security;
-
-

Project structure

Thank you!
